Once upon a time, there was a boy who became bored when he watched over his village sheep grazing on the hillside. To entertain himself, he shouted, "Wolf! Wolf! The wolf is chasing the sheep!"

When the villagers heard the cry, they came running up the hill to drive the wolf away. But, when they arrived, they saw no wolf. The boy was amused when he saw their angry faces.

"Don't scream wolf, boy," warned the villagers, "when there is no wolf!" They angrily went back down the hill.

Later, the little sheep herder cried out once again, "Wolf! Wolf! The wolf is chasing the sheep!" To his amusement, he looked on as the villagers came running up the hill to scare the wolf away.

As they saw there was no wolf, they said strictly, "Save your frightened cry for when there is a real wolf! Don't cry 'wolf' when there is no wolf!" But the boy grinned at their words while they walked grumbling down the hill once more.

After a while, the boy saw a real wolf sneaking around his flock. Alarmed, he jumped on his feet and cried out as loud as he could, "Wolf! Wolf!" But the villagers thought he was fooling them again, and so they didn't come to help.

At sunset, the villagers went looking for the boy who hadn't returned with their sheep. When they went up the hill, they found him weeping.

"There really was a wolf here! The flock is gone! I cried out, 'Wolf!' but you didn't come," he wailed.

Read the following passage, then choose the correct answer from a, b, c or d:

Asthma has a long history of evolution before it was categorically defined. The earliest mention of respiratory distress and wheezing was found in 2600 BC in China. It was treated by herbs till the 1950s when some tablets and adrenaline injections were invented.

Asthma is an inflammatory disease of the airways of the lungs. It is characterized by variable and recurring symptoms, reversible airflow obstruction with normal temperatures. It is one of the most common diseases of children, but adults can have asthma, too. Asthma causes wheezing, breathlessness, chest tightness and coughing at night or early in the morning.

Genetic, environmental and occupational factors are main causes for asthma. If you have asthma, you will suffer from it all the time. You will have asthma attacks only when something bothers your lungs. The attack happens in your body's airways, which are the paths that carry air to your lungs. As the air moves through your lungs, the airways become smaller. During an asthma attack, less air gets in and out of your lungs.

People can control asthma by avoiding some things that may lead to it or what we can call "asthma triggers". They are different from someone to another, but there are some common ones as tobacco smoke, dust mites, outdoor air pollution, pets, mold, smoke from burning wood or grass, and infections like flu. Asthma can be treated by breathing some medicines or taking some pills according to the doctor's advice. The effect of these two ways of medication can be either to have a quick-relief control to ease the symptoms of an asthma attack or to have a long control to have fewer and milder attacks.
